

Introducing new Fineo vacuum insulating glass
Up to 8 times more thermally efficient than single
glazing, with a U-value of 0.7
For indoor comfort and elegant aesthetics
Suitable in slim timber frame windows

FINEO
by AGC

Efficiency

Due to Fineo's **exceptional U-value**, the internal pane is warmer, which eliminates draughts and cold spots

Outstanding **traffic noise reduction**

As Fineo is so thin, you benefit from **more natural daylight** than with triple glazing

UV reduction and safety glass available as options

Reduce your use of fossil fuels

Retrofit into existing frames

Restrofit into existing frames for maximum sustainability

Historic & Conservation buildings

Double-glazing is not an option on many projects. However the slimness of Fineo preserves the authentic look of the building while bringing the thermal comfort to modern standards.

Sustainable

- Made in Europe
- 100% recyclable

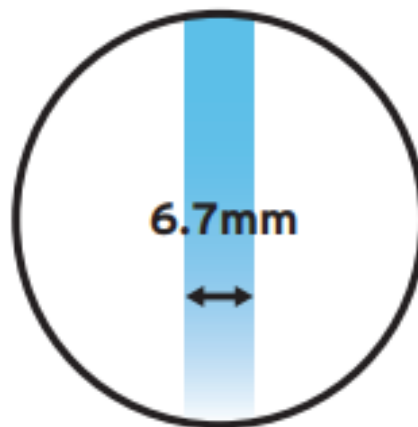

Durable

As there are no inert gases or organic seals, it means that the Fineo glass will not deteriorate over time.

How Does New FINEO Vacuum Insulated Glazing Compare To Some Traditional Glazing?

	Single Glazing	Double-Glazing	Triple Glazing	FINEO
Thickness	4mm	28mm	36mm	6.7mm
U-Value (W/m ² K)	5.8	1.2	0.8	0.7
Light Transmission	90	80	71	81
Sound Reduction Rw (C;Ctr) dB	29 (-2; -3)	31 (-2; -5)	32 (-1; -5)	35 (-2;-5)
Solar G-Value	0.87	0.71	0.61	0.68
